Processing Information

Collections are processed to a variety of levels, depending on the work necessary to make them usable, their perceived research value, the availability of staff, competing priorities, and whether or not further accruals are expected. The library attempts to provide a basic level of preservation and access for all collections, and does more extensive processing of higher priority collections as time and resources permit.

These materials have been arranged and described according to national and local standards. For more information, please refer to the Beinecke Manuscript Unit Processing Manual.

Horace L. Scott

Horace L. Scott (1885-1970) of Brattleboro, Vermont, received a degree in civil engineering from Rensselaer Polytechnic Institute in 1909. Following his graduation, he was hired as a junior engineer for the United States Reclamation Service and moved to Montana to work on the St. Mary Storage Unit of the Milk River Project in Glacier National Park and the Blackfeet Indian Reservation. In 1915, Scott was promoted to assistant engineer. He returned to Vermont in 1925, working as an engineer for the Sherman Construction Company in Bellows Falls.

Scope and Contents

The collection documents the Milk River Project, a project which called for a system of dams, canals, and reservoirs stretching across Montana with the purpose of creating 120,000 arable acres along the Milk River. Photographs, typescript reports, and printed materials accumulated by Horace L. Scott while civil service engineer for the United States Reclamation Service track the irrigation project conditionally approved by the Secretary of the Interior on 1903 March 14 and authorized on 1905 March 25. Includes 240 photographs and 12 postcards (many with captions) in 3 photograph albums and 20 loose photographs and 2 loose postcards depicting the irrigation project works, Glacier National Park, the Blackfeet Indian

Reservation and Siksikaitsitapi people, and the Flathead Indian Reservation and members of the Bitterroot Salish, Kootenai, and Pend d'Oreilles tribes. Also present are 4 typescript reports with 69 photographs and 36 blueprints for St. Mary's Canal bound in, produced by the United States Department of the Interior; 3 printed maps of United States Reclamation Service projects and 3 printed topographical folding maps of Montana; 2 pamphlets produced by the Great Northern Railway Company; and other printed articles and booklets relating to the Milk River Project and Montana. Included in the collection are Scott's resume, list of references, and notebook from Rensselaer Polytechnic Institute, circa 1909-1926.

Arrangement

Organized into five series: I. Milk River Project Reports, 1913-1915. II. Milk River Project Photographs and Postcards, circa 1909-1931, undated. III. Printed Materials, 1909-1913. IV. Maps, 1905-1908. V. Personal Papers, circa 1909-1939.
