Processing Information

Yale University records are arranged and described at the accession level by the creating office. The University Archives creates collection level descriptive records, but typically does no further arrangement and description at the accession level.

Biographical / Historical

In 1847, Yale established the Department of Philosophy and Arts, which offered courses in philosophy, the arts, and the sciences. As the scientific fields gained in strength, the School of Applied Chemistry and the School of Engineering were developed. These schools were combined in 1854 to form the Yale Scientific School. In 1858 Joseph Earl Sheffield purchased the old Medical Institution and presented it to Yale, along with scientific apparatus and an endowment. The new school, dedicated as the Sheffield Scientific School, in 1861 became one of the first schools of higher education in the United States to devote its curriculum specifically to scientific training. The faculty conducted graduate as well as undergraduate courses in the sciences and engineering until 1919 when the former were discontinued. In 1954 graduate level courses were reinstated. The School's functions were absorbed by the Graduate School in 1956.
