Biographical / Historical

Benjamin Lincoln, physician, anatomist, and medical educator, was born in Dennysville, Maine on October 11, 1802, the son of Theodore Lincoln, a judge and founding settler of Dennysville, and Hannah (Mayhew) Lincoln. He graduated from Bowdoin College in 1823. In the period 1825-1827, he spent part of his time in Boston studying medicine under George Cheyne Shattuck and attending selected courses at Harvard Medical School. In 1825-1826, he accompanied an ailing friend, Dr. Henry Little, to New Orleans for Little's health. He received his M.D. from Bowdoin in 1827, after which he began practice in Boston. He was invited to teach the course on anatomy at the University of Vermont in 1828 and was named professor the following year. At the invitation of Nathan Ryno Smith, he taught at the University of Maryland School of Medicine in 1831. Lincoln was a medical reformer who wanted to upgrade standards for admission to medical schools and graduation from them. He became embroiled in an acrimonious controversy over medical education with Dr. Theodore Woodward, Dean of Castleton Medical College in Castleton, Vermont, detailed in two pamphlets Lincoln published in 1833. He published at least four additional pieces on medical education in the Burlington Sentinel in 1834. Long suffering from rheumatism and by 1833 from tuberculosis, Lincoln left Burlington in 1834 to return to his family in Dennysville, where he died on February 26, 1835.

Thomas Lincoln, born in 1812 in Dennysville, Maine, was the youngest son of Theodore Lincoln. In 1829 he aided his brother Benjamin Lincoln with making anatomical preparations for medical education in Burlington, Vermont. In 1833, he accompanied John James Audubon to Labrador. The Lincoln's sparrow, located and shot on this trip by Lincoln, was named by Audubon for him. He attended the Medical School of Maine at Bowdoin College in 1830 but did not complete an M.D. there. Independently wealthy, Thomas Lincoln oversaw the farm on the family estate in Dennysville until his death in 1883. His sons were Dr. Arthur Talbot Lincoln and Edmund Lincoln.

Scope and Contents

Papers include letters by Benjamin Lincoln to his family, 1819-1834; a journal of his travel to New Orleans and journal of a geological and natural history voyage to New Brunswick; ephemera from his student

period at Bowdoin and from Burlington, Vermont; four letters on medical education published in the Burlington Sentinel; copies or drafts of letters and other writings on slavery and other issues by Thomas Lincoln; photographs of the descendants of Theodore Lincoln and of the family home in Dennysville, Maine; pamphlets; and a copy of the Centennial commemoration of the settlement of Dennyville, Maine, 1886, with genealogical information on the Lincoln family. A lengthy letter by Edmund Lincoln, son of Thomas Lincoln, described his travel to Japan in 1896.

Arrangement

Organized into two series: 1. Benjamin Lincoln. 2. Thomas Lincoln and the Lincoln family.
