

Appendix 5. Microfilmed Materials Not in Stiles Papers

This list contains brief descriptions of materials in Yale repositories relating to Ezra Stiles that are not located in the Stiles Papers but were included in the 1978 microfilm edition of the Papers. Locations of originals include collections held by the Beinecke Library, Yale University Library Manuscripts and Archives, and unidentified locations. Generally, descriptions and locations of originals are recorded as found on reference folders and microfilm targets removed from the Stiles Papers and discarded during processing in 2018. This list may be incomplete, and information identifying repositories, collections, and call numbers may be abbreviated or incomplete. Descriptions and locations of originals have not been verified.

This list is organized by series, and files are in order as found in each series in the microfilm edition. Microfilm item numbers are recorded for items filmed as part of the Miscellaneous Volumes and Papers Series (MVP #) and the Sermons Series (SER #).
